

School joins hands with Gredos San Diego

Having completed 10 years, the school is planning to take all its activities to a higher ground, with special focus on internationalism. To propel this initiative, students will be participating in Model United Nations (MUNs), Round-Square conferences, service projects and exchanges. The school has

joined hands with Gredos San Diego (GSD) Madrid, Spain. GSD is an educational institution of a secular character, whose ideology fosters tolerance and freedom of ideas. The duo will have an association for multiple programmes throughout the year, including teacher exchanges.
